01 COURSE OVERVIEW

A course on AI-assisted video production: automatic editing, captions, reframing, dubbing and avatars. AI handles the repetitive layers — transcript-based cutting, filler removal, captions, reframing, dubbing — while the learner keeps editorial control. Each tool is used on real footage with quality checks and disclosure practice.

Learners produce a long-form edit and ten derived vertical clips.

WHO IT IS FOR

Content creators and YouTubers

Marketing video teams

Course and webinar producers

Freelance editors

PREREQUISITES

Basic video editing familiarity.

02 LEARNING OUTCOMES

01 Edit from transcripts and remove filler automatically.

03 Reframe horizontal footage for vertical formats.

05 Dub and translate content responsibly.

07 Batch produce short clips from long content.

02 Generate accurate captions and subtitles.

04 Clean audio and enhance voice with AI tools.

06 Produce avatar-presented videos where appropriate.
